## Symptoms:

The following symptoms may develop in the 14 days following exposure:

- Cough
- Difficulty Breathing
- Fever

- ✦ **Sensitivity:** Effects may be increased and more severe in people with weakened immune systems, older people, people with diabetes, cancer or chronic lung disease.
- ✦ **Spread:** Transmission can happen if either of the following occurs:
  - People in close contact (within 2 meters) of an infected person allowing inhalation of virus into the lungs from coughs and sneezes.
  - Touching a surface, object or hand of an infected person that has been contaminated with respiratory secretions from an infected person then touching own mouth, nose or eyes.

**Control Measures**

- ✦ **Update:** The company will keep updated on latest Government guidance and update policies and procedures accordingly.
- ✦ **Hygiene:** Ensure you wash hands regularly for 20 seconds with hot water and soap:

- ✦ **Catch it, Bin it, kill it:** cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze.
- ✦ **Self-Isolation:** Ensure you follow the Gov/NHS guidance for self-isolation where required if you have either:
  - A high temperature
  - A new, continuous cough.

**Information:** If you require any further information or have any concerns speak to a member of management immediately.
